Gravelous soil

Traditional harvest from destemmed and stoned grapes  
Alcoholic fermentation  
Extraction of the fruit by pumping-over and maceration  
25 days  
Blending of different grape varieties in late winter

Malepere - a wonderful winemaking area in Languedoc where all categories are combined! The region is a blend of Mediterranean (hot) and oceanic (wet) climates, a crossroads between polyculture and the grapevine, and provides a unique association of grape varieties from south-western France and the Mediterranean. Here, close by the Cité de Carcassonne, you can explore Château Pech Taulier and its wines. These wines lead you from surprise to surprise, there's no doubt about it. To begin with, a deep colour, correctly presaging the wine's concentration. Then the aroma draws you in with the intense notes of blackcurrant, liquorice and fresh pepper. The pleasure continues on the palate with aromas of tapenade, berries and cocoa... The combined effect is long-lasting and refined.

A great wine to be served with a medium-rare rack of lamb and truffled mashed potatoes. Lunch is ready! A pure moment of delight.

Qualenvi certified since 2006, we are now labeled **High Environmental Value (HVE)** operation. This label is based on indicators and a requirement for results of **"green practices"** which relate to the entire operation. Beyond the environmental commitment, we have entered the **«big leagues» of the Quality** approach by obtaining **ISO 22000 certification**. This **international standard** demonstrates the company's ability to control Food Safety.
